

Meridian® Solid Surface Dark Color Notice

Solid Surface Materials have come to be known for their beauty and durability in a wide variety of applications. However, certain solid surface colors are not recommended for applications where their appearance may be compromised under normal use and care. Such is the case with dark colored solid surface materials used in high traffic areas such as kitchen countertops, commercial countertops, or other areas of high use.

Meridian® Solid Surface Materials are engineered to provide years of use in a large variety of applications, but we strongly discourage the use of dark colors for kitchen countertops, commercial countertops, and any other high traffic areas, as darker colors will require a great deal of maintenance to keep them looking their best. Specifically, colors will often appear cloudy and inconsistent in finish. Darker colors look best when finished with a high gloss luster, but a high gloss finish will also show everyday wear and tear much more readily than a matte finish and therefore require more maintenance to keep the product looking its best.

Applications for which darker colors are best suited include low traffic counters such as residential bathroom countertops. Other recommended uses include accent stripes and inlays, backsplashes and trim pieces.

Solid black is suggested for use as an accent or inlay only. Tower Industries will not manufacture solid black countertops for any application and will only provide solid black as an inlay or accent color.

Clients that choose to use dark colors in high traffic areas are doing so with the understanding that these colors are not best suited for this use, will take more care and maintenance to keep them looking their best, and appear best with a high gloss finish that carries a significant up-charge over a standard matte finish.

This form shall be used as contract between three parties. First: Tower Industries, Ltd, Second: The dealer/seller of the dark colored product, and Third: the end-user/purchaser of the dark colored product.

Tower Industries, Ltd. will not warranty the finish or appearance of dark colored Meridian® Solid Surface products. The customer accepts the above without prejudice and agrees to pay additional fees for altering the final finish to their liking.
